Synthetic current edition

This body has **bold**, *italic*, `inline  code`, an en-dash, an em-dash, and a mathematical minus −. Evidence stays a local link.

Offline equations

$$A \geq c / (1 - p), B \geq 2c + A / (2p).$$

$$U \leq \min(Q, \Sigma_v \operatorname{depth}(v)) \leq \min(Q, B \cdot h).$$

$$I_b = (c / b) \cdot \operatorname{choose}(b, 2) - (c - c / b).$$

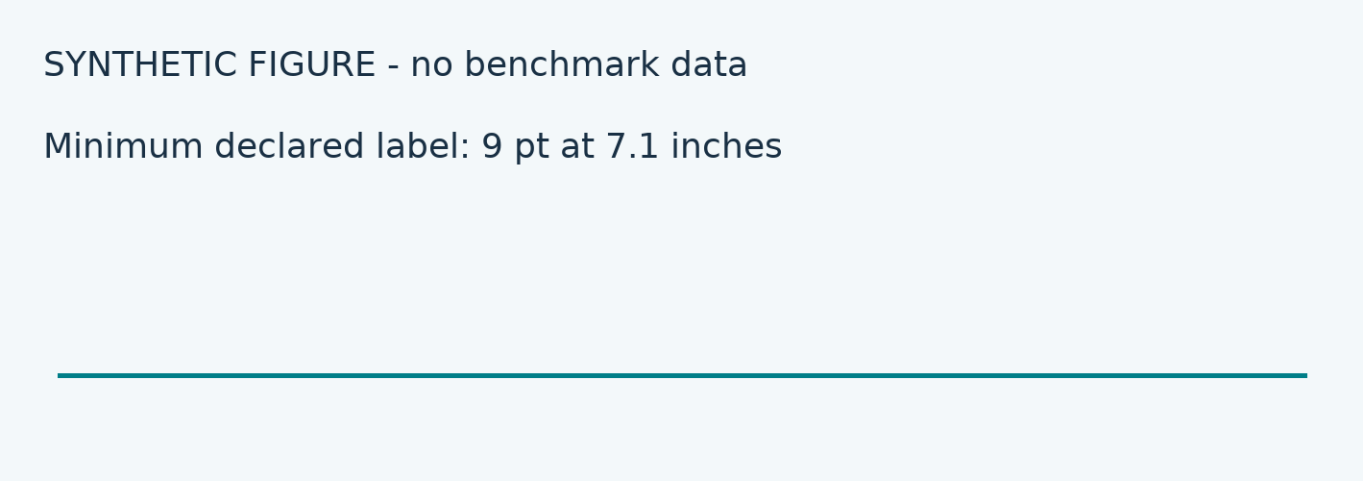

Controls and ranges

Case	KKT	Retained Boruvka	Deduplicating Boruvka	Kruskal	Prim	Original Boruvka
synthetic_small_identifier	1.49	1.00	1.19	0.78	0.81	0.89
synthetic_large_identifier	0.84	1.00	2.15	0.72	0.79	1.13

1. A numbered item.
2. Another item preserving the endpoint loss.

- One bullet with **emphasis**.
- Another bullet with same-page navigation.

```
This_code_path_is_deliberately_long_to_exercise_wrapping_without_reducing_the_fixed_nine_point_
type_size_and_without_clipping_the_page_frame.
    indentation is retained
```

Synthetic chart caption, preserving every stated range.

Closing body sentinel

No measurements or final report text are synthesized here.
